Summary

Motivated backend developer with solid experience in REST APIs, backend systems, and frontend integration using Node.js, Fastify, and React. Proficient in writing clean, scalable code with a focus on security, performance, and Agile delivery.

Technical Skills

Languages:	JavaScript, TypeScript, HTML, CSS, SQL, Core Java
Backend:	Node.js, Express.js, Fastify, REST APIs
Frontend:	React.js, React Native
Databases:	MongoDB, MySQL, PostgreSQL
Tools:	Git, GitHub, Postman, VS Code
Concepts:	JWT, Middleware, Agile, Debugging

Experience

The Baap Company –   *May 2024 – Feb 2025*
Full Stack Developer – Sangamner

- Built full-stack apps with Node.js, React, MongoDB/MySQL.
- Developed scalable REST APIs using Express and Fastify.
- Wrote modular TypeScript code and followed Agile practices.

Projects

HireHQ Platform – *Node.js, Fastify, MySQL, JWT, TypeScript*

- Built APIs for hiring: job posts, roles, candidates.
- Secured routes using JWT auth and role middleware.

ERP Management System – *Node.js, Express, MySQL, JWT*

- Created ERP modules: inventory, HR, finance.
- Used secure, optimized REST APIs and SQL schemas.

Education

University of Mysore – BCA   *Dec 2023 – May 2026*
Sangamner, Maharashtra

Soft Skills

- Quick learner
- Strong problem-solving skills
- Team collaboration
- Effective communication

Interests

- API design
- System architecture
- Backend optimization
- Mobile development
