YASH KANDEKAR

Software Developer | Node.js | React.js | PostgreSQL

kandekaryash33@gmail.com | +91 8788457133 | linkedin.com/in/yash-kandekar-121452241

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in Node.js (backend) and React.js (frontend), specializing in building scalable, secure, and high-performance web applications. Experienced in designing RESTful APIs, database architecture, backend optimization, and production support using Node.js, Fastify, Express.js, and PostgreSQL. Strong team player with leadership experience mentoring developers and collaborating across cross-functional teams to deliver high-quality products.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Fastify, REST API Development

Frontend: React.js, HTML5, CSS3, JavaScript (ES6)

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Tools & Platforms: Git, GitHub, GitLab, Bitbucket, Jira, VS Code, Postman

Practices: Database Design, Production Support, Performance Optimization, Code Review

STRENGTHS

- Backend Development
- REST API Design
- Database Design & Optimization
- Problem Solving
- Production Support
- Team Leadership
- Code Review
- Quick Learner
- Team Collaboration

PROFESSIONAL EXPERIENCE

Software Developer (Backend), Baap Services Pvt. Ltd., Sangamner *January 2025 – Present*

Project: ExamCraft — Backend Technical Lead *January 2026 – Present*

- Lead end-to-end backend development of the ExamCraft platform (Node.js, Fastify, PostgreSQL), architecting REST API modules from the ground up.
- Built APIs powering Study Plans, Mock Tests, User Management, Subscriptions, Payments, Notifications, and Reporting — the platform's core learning workflows.
- Plan sprint-level tasks, review code, and mentor junior developers to keep releases on schedule.
- Run root-cause analysis on production issues and tune SQL queries to improve API response time.

Project: ERP System *August 2025 – December 2025*

- Built backend modules and APIs powering core workflows across enterprise ERP business modules.
- Tuned PostgreSQL queries and indexing strategy to reduce data retrieval time.
- Partnered with frontend, QA, and business teams to ship features on schedule with minimal rework.

Project: Hire HQ *January 2025 – July 2025*

- Built secure backend services powering end-to-end recruitment and hiring workflows.
- Structured normalized database schemas for candidate, job, and interview data, simplifying future feature additions.
- Integrated third-party services and resolved production issues, improving platform uptime and reliability.

KEY ACHIEVEMENTS

- Successfully led backend development of the ExamCraft platform, from architecture to production.
- Delivered backend solutions across three major projects — Hire HQ, ERP, and ExamCraft.
- Improved API performance and database efficiency through PostgreSQL query optimization.
- Reduced recurring production issues through long-term fixes; mentored junior backend developers.

EDUCATION & CERTIFICATIONS

Education: Bachelor of Computer Applications (BCA)

Certification: React.js Certification
